Re: Airport Feasibility Study

Dear Mr. Benjamin:

I appreciate your efforts in trying to obtain a feasibility study to help gather all of the facts concerning the airport. I believe this is important and smart so that everyone can make an informed decision concerning our airport and the best possible location for it.

I have fond memories of our airport. Jimmy Doolittle, who was involved in the raid on Japan, would practice right here at our little airport. Even with a lot of great memories of the airport at its current location, I still feel, that whatever the outcome, we should do what is best for the community and the people flying the airplanes.

I support you and all of the civic-minded citizens who are involved in endeavoring to acquire a feasibility study. Thank you for all of your hard work and first-rate citizenship.

Sincerely,

Frances Langford
